

# LESSON X

## InDesign

### InDesign Workplace

InDesign's basic appearance consists of a piece of paper on a working area known as the **'paste board'**, surrounded by a set of tools to perform a whole host of functions. Luckily, most of the terminology and tools are very similar to Photoshop and Illustrator. This virtual 'piece of paper' is your leaflet or poster, or the current page of a longer document such as a newsletter or booklet:

### Getting Around

**Status bar:** Since InDesign is often used with pages, the status bar allows you to jump page to page with the arrows, or type a page number in to jump to that page.

**Palettes:** Palettes are like the panels of Illustrator, and you can select or deselect any of them under >> Window. Some useful ones are colour, swatches, and pages.

# Shortcuts

The hotkeys for InDesign are also very similar to Photoshop and Illustrator. The usual Text (**T**), Pen Tool (**P**), Selection (**V**), and Zoom (**Z**) are the same, but here are a few specific/useful in InDesign:

**W**: Toggle between normal view and preview view (seeing the layout with or without line guides)

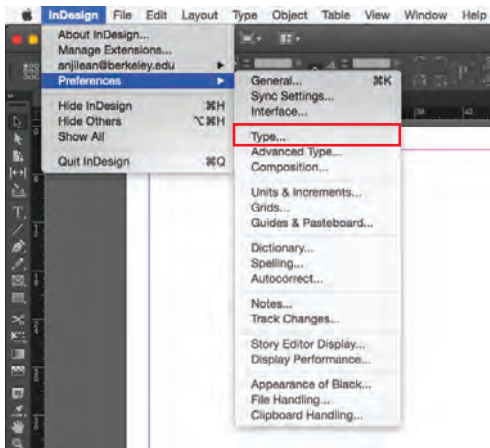

**Cmd/ctrl-opt-0 (zero)**: Fit spread to window

**Cmd/ctrl-opt-G**: Select all guides

**Opt-up/down arrow**: Increase/decrease leading (space between lines)

# Preferences

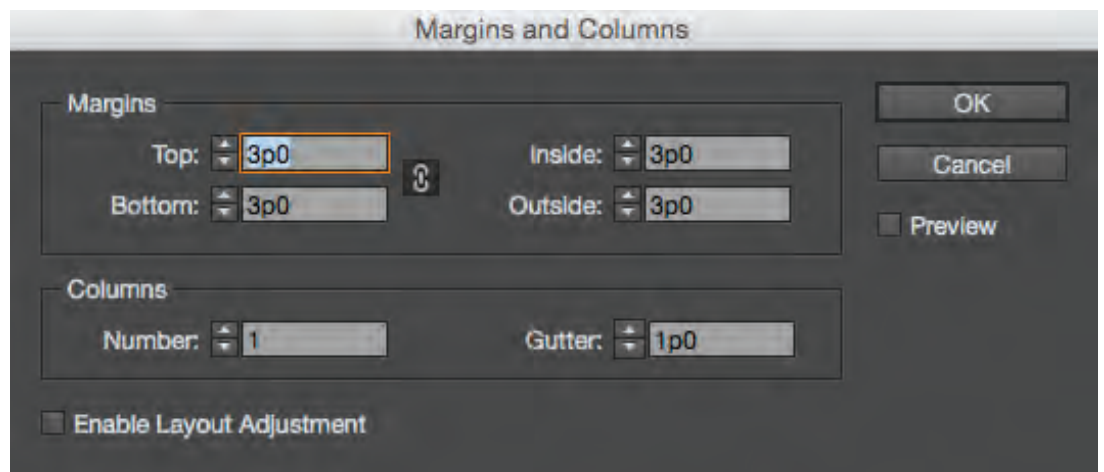

The default preferences should be fine, but they're fun to look through (like changing the colour of your grid lines or tweak things like autocorrect and unit of measurement preferences). One thing you should consider changing is checking the box "Use Typographer's Quotes," which will make the default quotation marks " " instead of ". InDesign >> Preferences >> Type.

# Margins

## Layout >> Margins and Columns

Margins are usually around 0.5 inches. (The unit of measurement can be changed in preferences) You can also preview the margins and columns to see if they are to your liking.

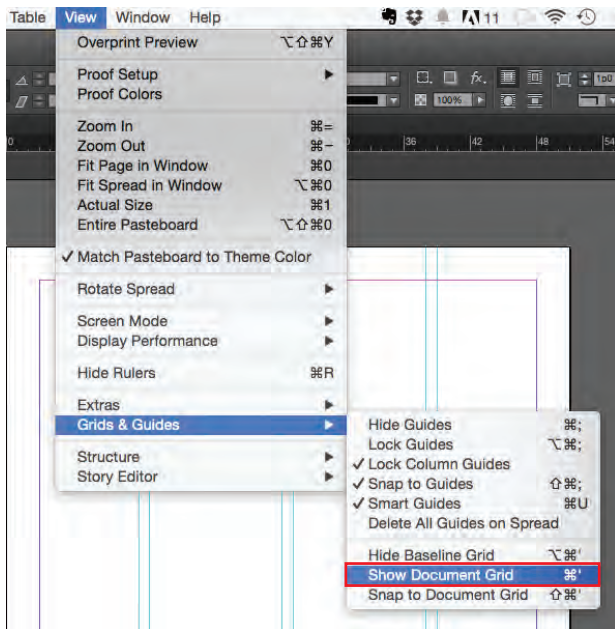

# Grids

There are two kinds of nonprinting grids: baseline grid for aligning columns of text and photos, and a document grid for aligning objects. The baseline grid covers entire spreads, but document grid covers the entire pasteboard.

## Document Grid (Cmd-')

### View >> Grids & Guides >> Show/Hide Document Grid

The document grid resembles graph paper, and is used for aligning objects. It can appear in front of or behind all guides, layers, and objects, but cannot be assigned to any layer.

## Baseline Grid

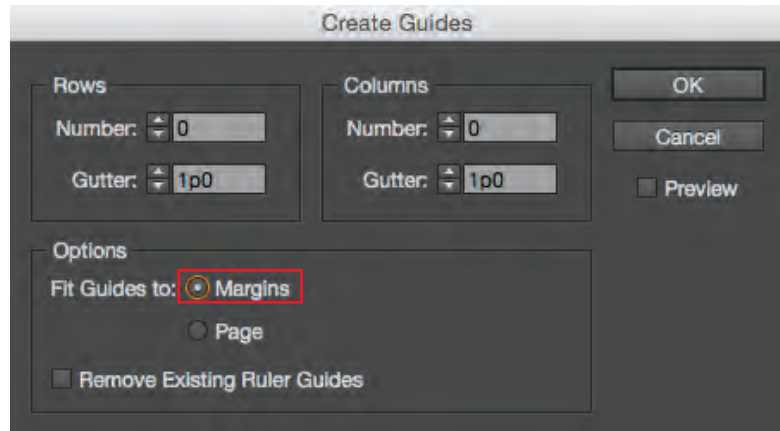

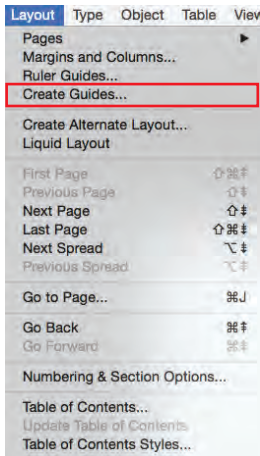

### View >> Grids & Guides >> Show/Hide Baseline Grid

The baseline grid is used for aligning columns of text or pictures, and the number of rows and columns can be customized. The baseline grid covers entire spreads.

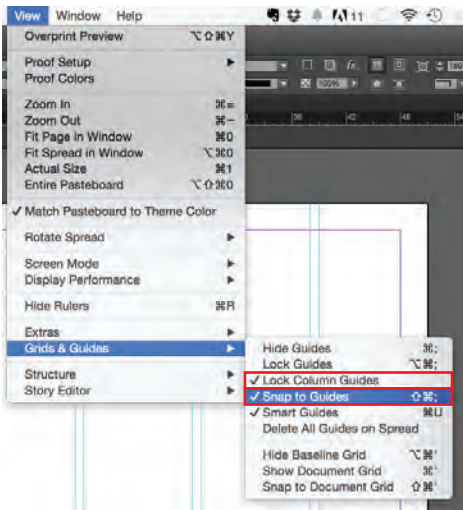

## Layout >> Create Guides

The number of rows and columns are up to you, but make sure the Fit Guides are selected for Margins.

**Gutters** are the inside margins or blank space between two facing pages. It is the extra space allowance used to accommodate the binding in books and magazines.

## View >> Grids & Guides >> Snap to Guides

This will make sure the objects you place align snap to the rows and columns of the baseline grid.

## View >> Grids & Guides >> Lock Guides

This will keep the baseline grid in place.

## W

The hotkey W will toggle between normal view and preview view (show or not show the grids you have in place).

## Type

Since InDesign is often used in print, its text functions are very intuitive and really quite powerful.

With Type Tool (T), click and drag to create an area for text. Here are a few useful text-formatting tools:

## Place (Cmd/ctrl-D)

### File >> Place >> select document/picture

Here you can select a text file or photo and drag whatever sized box you wish for the text or photo to fill.

## Character Formatting

To select text in different ways:

- **double-click** to select a word
- **triple-click** to select a line of text
- **quadruple-click** to select a paragraph
- **drag** over a range of text (single character or paragraphs)
- **Cmd/ctrl-A** to select all

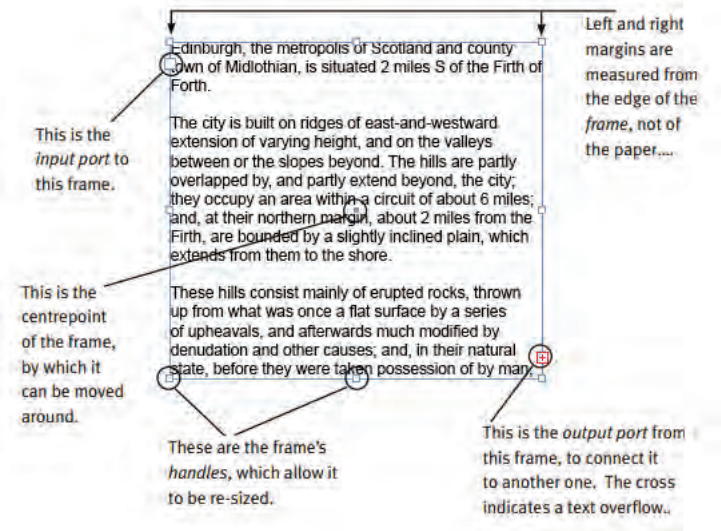

## Text Frames

Every piece of text or graphic in InDesign has to be held in a Frame. Simply dragging a box with the Type Tool (T) creates a Text Frame.

You can change the size and shape of your text frame by dragging its handles.

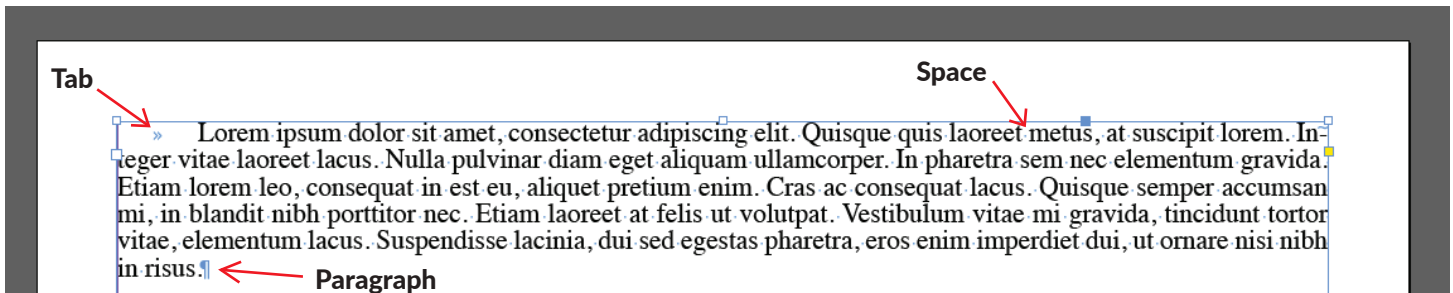

By selecting the Selection Tool (V) and clicking the cross in the output port, the pointer is now “loaded with text.” Click and drag a box on the Pasteboard to make a temporary home for some more of the text.

## Hidden Characters

### Type >> Show Hidden Characters

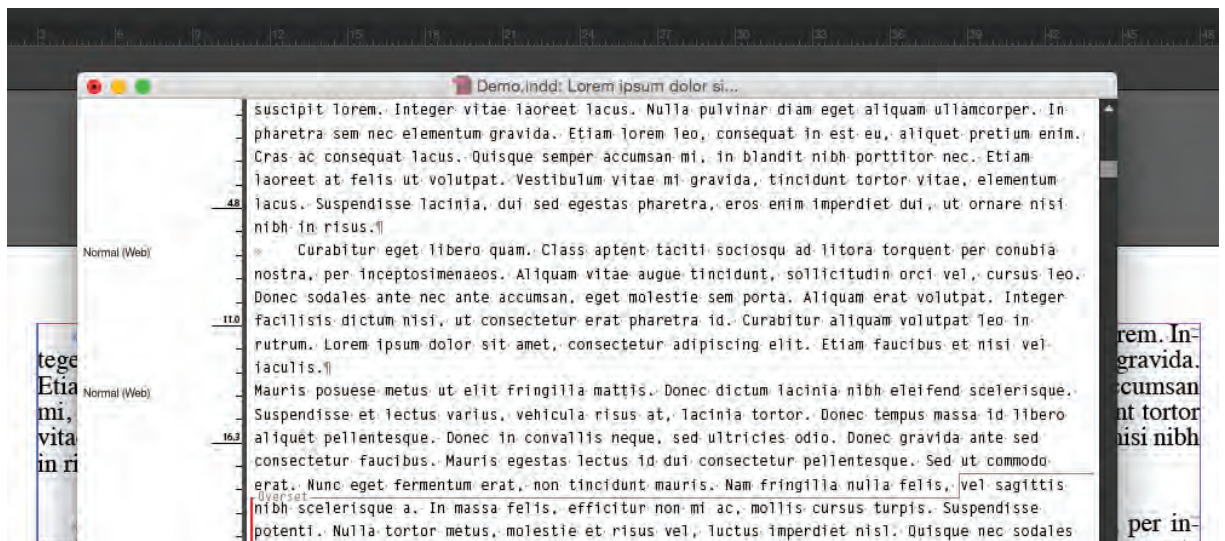

This lets you see the “invisible” characters in a document, like spaces, paragraphs, and tabs.

## Story Editor (Cmd-Y)

### Edit >> Edit in Story Editor

The Story Editor is like a simple text editor built into InDesign. It allows you to see the raw text in your document, without the distractions of formatting or layout. This is a good way to work with lengthy text when doing basic editing, like spell check. It also has global change functions, like the Find/Change function, which allows you to replace every occurrence of a word or phrase with another word or phrase.

# Examples

**FASHION MEN 2010 | 117**

**THE METROPOLITAN MAN 2010**

Black, white, tan, khaki, olive, red, blue, purple, green, grey, white, black. A man's world of color in response. What results from the mix of a metropolitan man's life and the colors of the city.

*(Small text columns describing fashion trends and colors)*

The **Battlefield Chronicles**

**SODOM DESTROYED**

**APOCALYPTIC FIRE CLAIMS MANY LIVES IN DAY OF HORROR**

**A tale of two cities: Sodom and Gomorrah in ruins**

**OLEN BODMAN - JERUSALEM, ISRAEL**

According to one eye witness who happened to be passing by the city of Sodom on the night of the destruction, the city was a peaceful one... (Continued on page 42)

**BEST of the BAY AREA 2009**

What do you love about the Bay Area?

It's the inventive people, the view, the cutting-edge architecture, the killer cocktails?

We say all of the above, and more. In our annual Best of the Bay Area issue, we discuss what we love about living here right now. Plus, the 10 Best ways to make each a part of a very good life. 1499 are a few of our picks.

**what we love**  
That the latest edition of SOMA is in... (Small text columns)

**THE MISSION OF THE NEW YORK PUBLIC LIBRARY**

**DISCOVER**  
**CONNECT**  
**GET INSPIRED**

**1** We inspire lifelong learning, advance knowledge and strengthen our communities.

**2** We advance knowledge by providing free and open access to our collections and services. And, we share the joy of learning.

**3** We inspire our communities by providing all accessible and participatory to all.
