A Trip Down Memory Lane...

**CONSORT
diagrams
in Word
and Powerpoint**

**CONSORT
diagrams
in R**

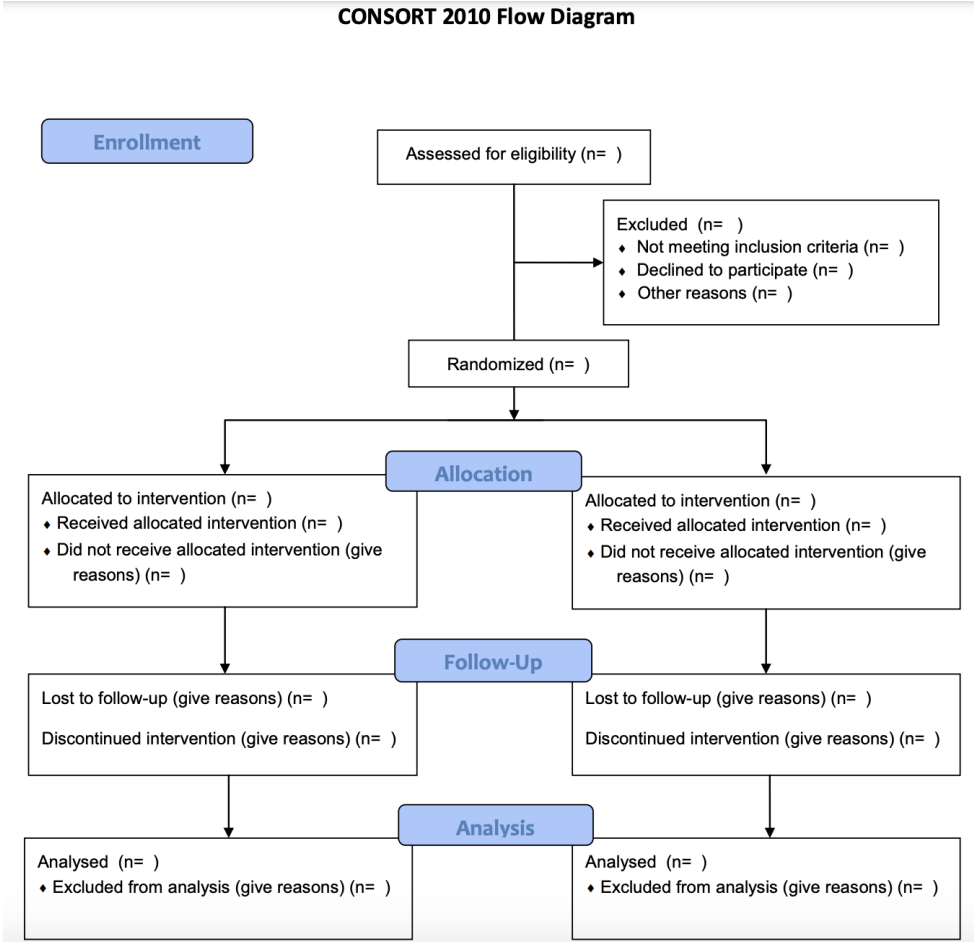

Overview

- CONSORT Statement and Diagram
- DiagrammeR Package
 - GraphViz and DOT
 - Nodes, Edges, Graph Capabilities
- Building One, Yay!

About CONSORT Diagrams

- **CONSORT** (Consolidated Standards of Reporting Trials) **Statement**
- Guide to help researchers effectively report randomized trials to enhance transparency of study design and analysis
- For 2010, includes a 25-item checklist and a diagram showing participant flow
- Reporting participant flow helps assess the quality of the study design and reliability of the results

Example¹

1 <http://www.consort-statement.org/consort-statement/flow-diagram>

DiagrammeR Package

- Powerful R package that allows you to create various diagrams and graphs
- Functionality includes GraphViz and DOT (graph description) language
- Pass various graph specifications to `grViz()` function using DOT language
- DOT is generally customizable and syntax is generally straightforward
- GraphViz substitution allows for mixing in R expressions

DiagrammeR Package

- Powerful R package that allows you to create various diagrams and graphs
- Functionality includes GraphViz and DOT (graph description) language
- Pass various graph specifications to `grViz()` function using DOT language
- DOT is generally customizable and syntax is generally straightforward
- GraphViz substitution allows for mixing in R expressions

Let's dive a bit deeper into the GraphViz specifications!

GraphViz Specifications

Graph statement

Define overall attributes of the visual you are creating

- `graph [nodesep = 0.8]`

Node statement

Define attributes for nodes, styled as boxes, circles, and other shapes

- `node [shape = box, width = 2] A; B; C; D`

Edge statement

Define attributes for the edges that connect nodes

- `edge [arrowhead = diamonds] A -> B; B -> C; C -> D [label = 'Hello!']`

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
  
#Add edges  
  
}"  
)
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
  
#Add edges  
  
}"  
)
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
  
#Add edges  
  
}"  
)
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
C #BREAK4  
  
#Add edges  
  
}"  
)
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
C #BREAK4  
D #BREAK5  
  
#Add edges  
}  
")
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
C #BREAK4  
D #BREAK5  
  
#Add edges  
edge [arrowhead = diamonds] #BREAK6  
A -> B #BREAK6  
  
}"  
)
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
C #BREAK4  
D #BREAK5  
  
#Add edges  
edge [arrowhead = diamonds] #BREAK6  
A -> B #BREAK6  
B -> C #BREAK7  
  
}"  
)
```

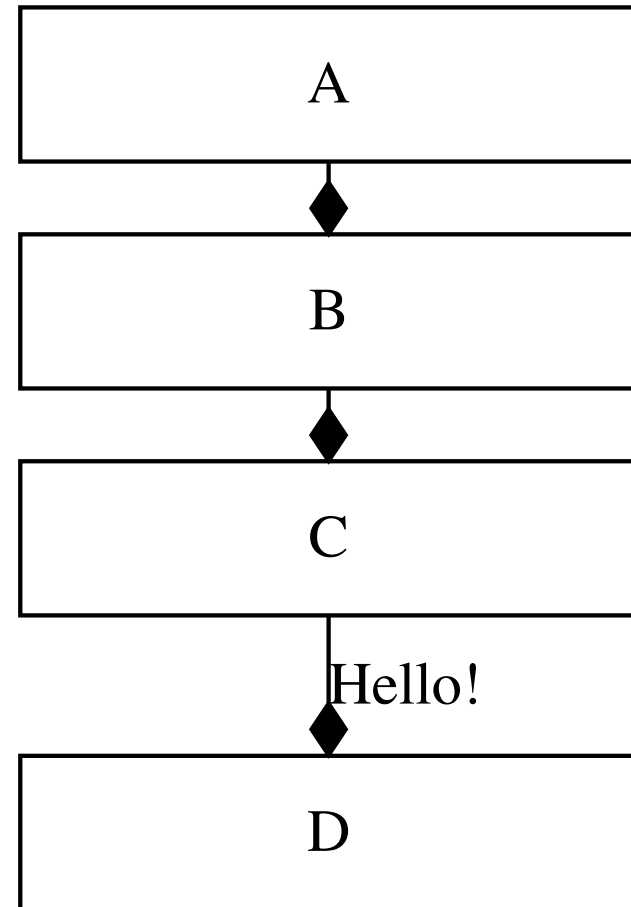

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
C #BREAK4  
D #BREAK5  
  
#Add edges  
edge [arrowhead = diamonds] #BREAK6  
A -> B #BREAK6  
B -> C #BREAK7  
C -> D [label = 'Hello!'] #BREAK8  
  
}"  
)
```

Basic Example

```
grViz("  
digraph basic_example {  
  
#Add nodes  
node [shape = box, width = 2] #BREAK2  
A #BREAK2  
B #BREAK3  
C #BREAK4  
D #BREAK5  
  
#Add edges  
edge [arrowhead = diamonds] #BREAK6  
A -> B #BREAK6  
B -> C #BREAK7  
C -> D [label = 'Hello!'] #BREAK8  
  
#Add graph statement #BREAK9  
graph [ranksep = 0.1] #BREAK9  
}"  
)
```

Example Trial Data

- 2-arm randomized controlled trial comparing care from a home nurse plus standard prenatal care versus standard prenatal care for pregnant women with high glucose levels
- Primary outcome was composite measure of perinatal death and neonatal complications
- 843 pregnant women were screened and assessed for eligibility at doctors' offices
 - 26 did not meet inclusion criteria; 36 declined to participate; 11 could not be reached
- 770 were eligible and randomized
- 391 were assigned to treatment group; 379 were assigned to control group
 - Treatment: 21/391 were lost to follow-up and 8/391 had no delivery data
 - Control: 17/379 were lost to follow-up and 10/379 had no delivery data

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
  
#Add edges  
  
#Add graph statement  
}"  
)
```

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
node [shape = box, fontsize = 12, color = black, wid  
A; B; C; D; E; F; G #BREAK2  
  
#Add edges  
  
#Add graph statement  
}"  
)
```

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
node [shape = box, fontsize = 12, color = black, wid  
A; B; C; D; E; F; G #BREAK2  
  
#Add edges  
edge [arrowhead = none] #BREAK3  
A -> B #BREAK3  
  
#Add graph statement  
}"  
)
```

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
node [shape = box, fontsize = 12, color = black, wid  
A; B; C; D; E; F; G #BREAK2  
  
#Add edges  
edge [arrowhead = none] #BREAK3  
A -> B #BREAK3  
B -> C #BREAK4  
  
#Add graph statement  
}"  
)
```

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
node [shape = box, fontsize = 12, color = black, wid  
A; B; C; D; E; F; G #BREAK2  
  
#Add edges  
edge [arrowhead = none] #BREAK3  
A -> B #BREAK3  
B -> C #BREAK4  
C -> D #BREAK5  
  
#Add graph statement  
}"  
)
```

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
node [shape = box, fontsize = 12, color = black, width = 100px, height = 30px]  
A; B; C; D; E; F; G #BREAK2  
  
#Add edges  
edge [arrowhead = none] #BREAK3  
A -> B #BREAK3  
B -> C #BREAK4  
C -> D #BREAK5  
E -> F #BREAK6  
  
#Add graph statement  
}"  
)
```

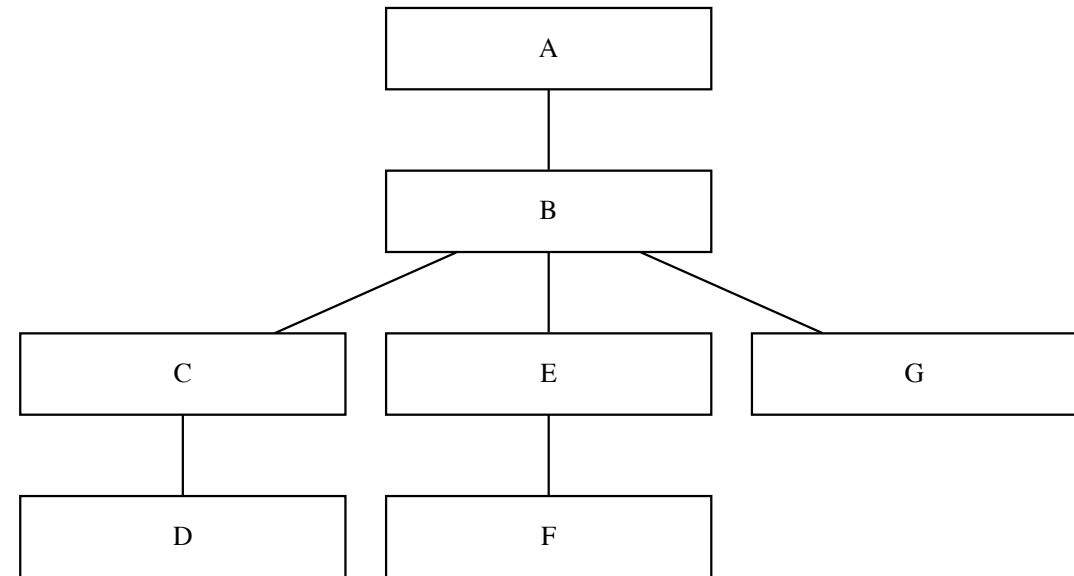

Attempt 1 - Build Skeleton

```
grViz("  
digraph attempt_1 {  
#Add nodes  
node [shape = box, fontsize = 12, color = black, wid  
A; B; C; D; E; F; G #BREAK2  
  
#Add edges  
edge [arrowhead = none] #BREAK3  
A -> B #BREAK3  
B -> C #BREAK4  
C -> D #BREAK5  
E -> F #BREAK6  
B -> E #BREAK7  
  
#Add graph statement  
}"  
)
```

Attempt 1 - Build Skeleton

```
grViz("

  ]  
F [label = 'ITT Analysis (n=352)']  
G [label = <  
  &#8226; 26: Failed Inclusion criteria<br A  
  &#8226; 36: Declined Participation<br ALIG
```

About That...

- We were nearly able to obtain our desired result
- GraphViz generally does a great job connecting edges to nodes, but needs help from time to time
- We want edges to be completely vertical or horizontal
- We don't want the diagram to be angled or tilted from the addition of any side nodes
- Try to visualize as a grid

About That...

- We were nearly able to obtain our desired result
- GraphViz generally does a great job connecting edges to nodes, but needs help from time to time
- We want edges to be completely vertical or horizontal
- We don't want the diagram to be angled or tilted from the addition of any side nodes
- Try to visualize as a grid

Let's try again!

Questions?

Attempt 2 - Build Skeleton

```
grViz("  
digraph {  
#Add nodes  
  
#Add edges  
  
#Add additional arrowheads  
  
#Use rank to keep these three boxes on the same rank  
#Use nodesep to keep the nodes a bit closer together  
}"  
)
```

Attempt 2 - Build Skeleton

```
grViz("  
digraph {  
#Add nodes  
node [style = 'solid', shape = 'box', width = 2, font  
1; 2; 3; 4; 5; 6; 7; 8; 9; 10; 11; 12; 13; 14; 15; 1  
  
#Add edges  
  
#Add additional arrowheads  
  
#Use rank to keep these three boxes on the same rank  
#Use nodesep to keep the nodes a bit closer together  
}"  
)
```

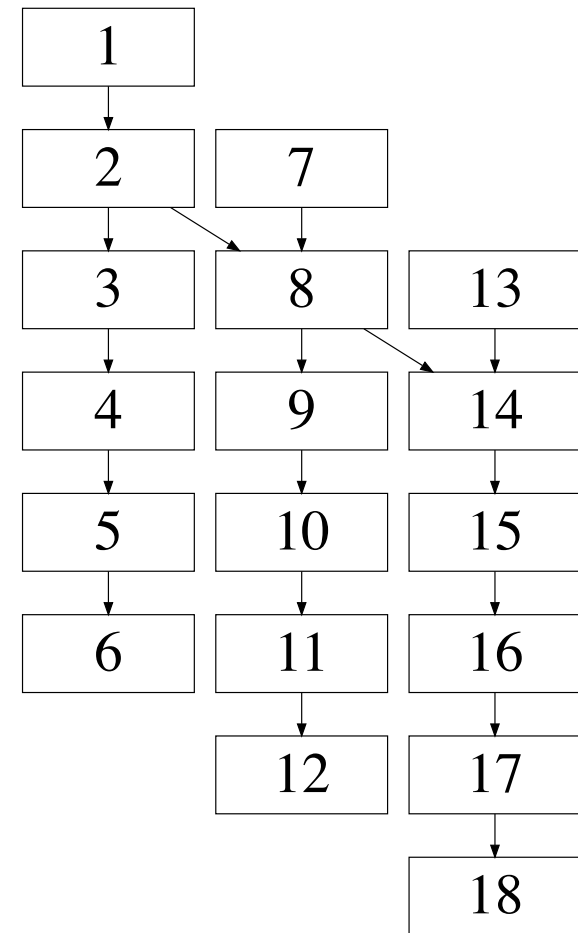

Attempt 2 - Build Skeleton

```
grViz("  
digraph {  
#Add nodes  
node [style = 'solid', shape = 'box', width = 2, font  
1; 2; 3; 4; 5; 6; 7; 8; 9; 10; 11; 12; 13; 14; 15; 16;  
#Add edges  
edge [arrowhead = 'normal', color = 'black'] #BREAK3  
1 -> 2; 2 -> 3; 3 -> 4; 4 -> 5; 5 -> 6; 7 -> 8; 8 ->  
#Add additional arrowheads  
  
#Use rank to keep these three boxes on the same rank  
#Use nodesep to keep the nodes a bit closer together  
}"  
)
```

Attempt 2 - Define Grid

- **Red:** Will be removed from the visual
- **Blue:** Will be modified; here, we will make the nodes and arrowheads essentially invisible; we will also add some headings
- **Black:** Keep for visual; they are the backbone of the visual

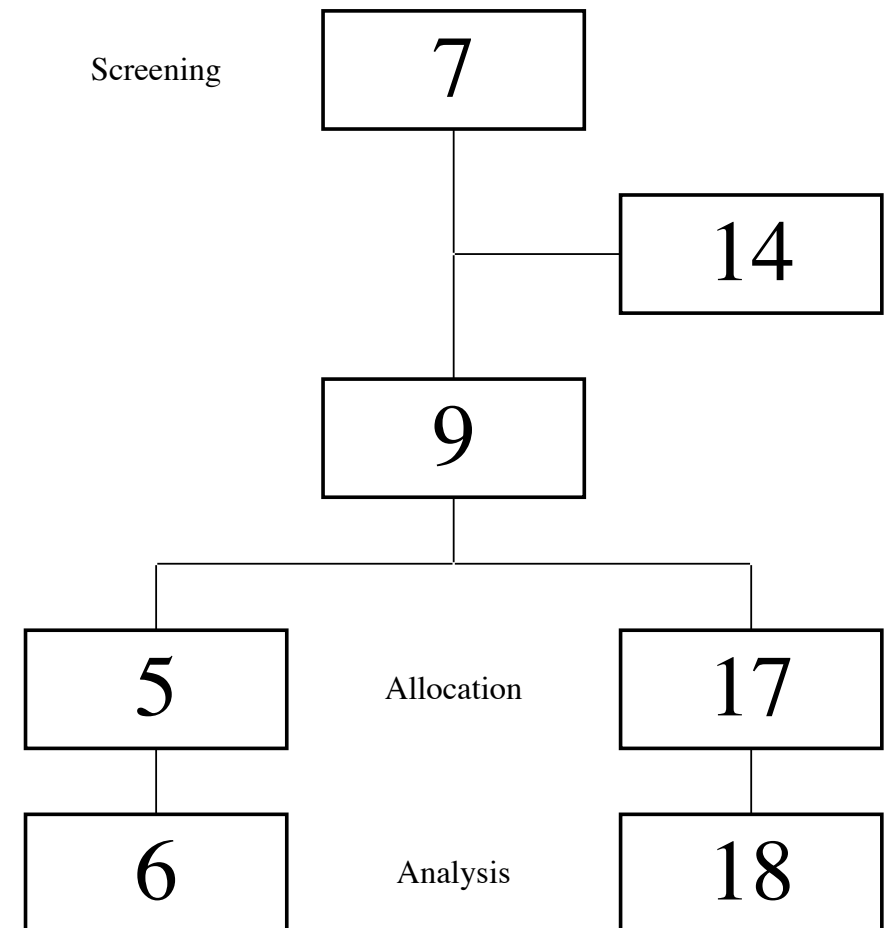

Attempt 2 - Shape the Diagram

- `shape = 'none'`: Remove outlines of nodes
- `height = 0.1, width = 0.1`: Started shrinking blue nodes; they will be a size of 0 for next step
 - Notice that the arrows are starting to converge together in those locations
- `fontsize = 12`: Adjusted font size for the headings

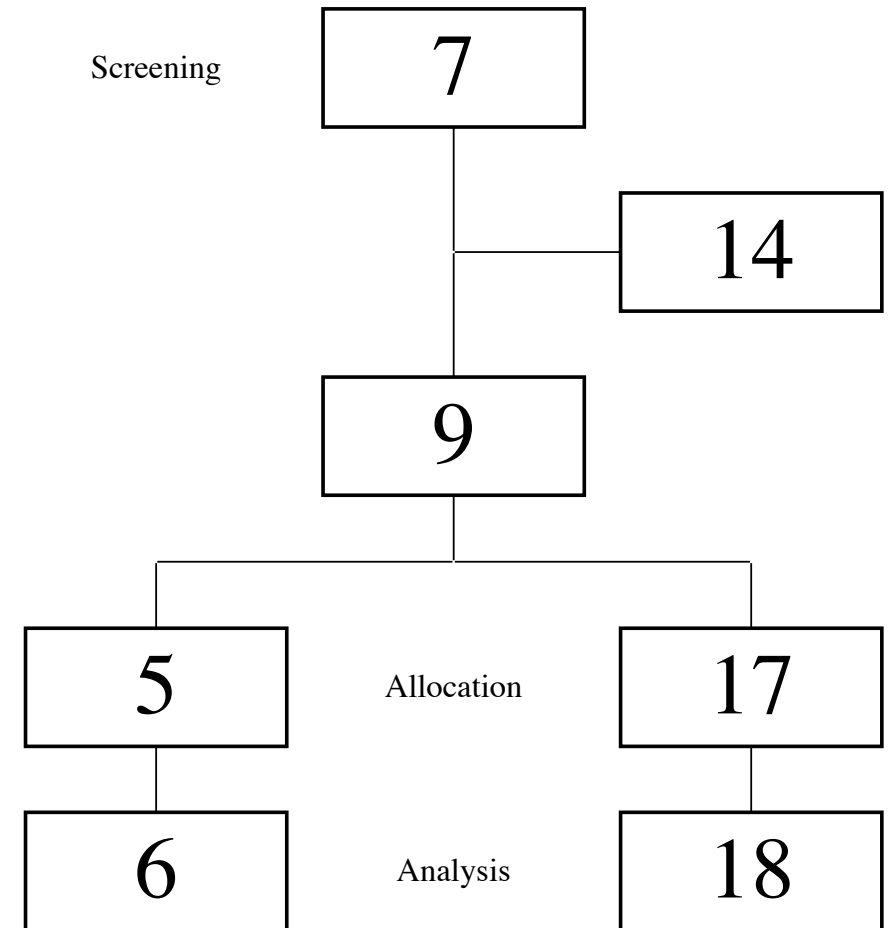

Attempt 2 - Finalize the Diagram

- `label = ''`: Make the labels invisible in order to connect various edges
 - `4 [label = '', style = 'invisible', shape = 'none', height = 0, width = 0, fontsize = 12, color = blue]`
- `[arrowhead = 'none', color = black]`: Remove arrowheads, but keep as black
 - Use `color = #00000000` to make them invisible

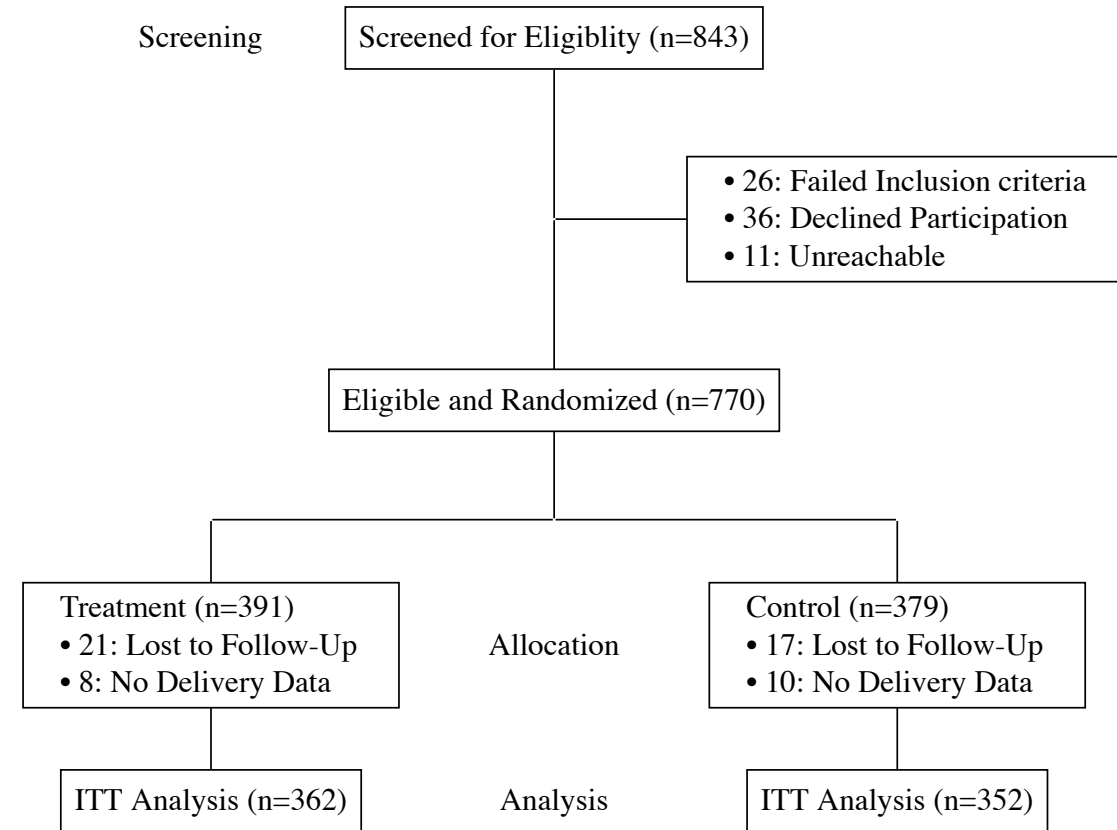

Attempt 2 - Finalize the Diagram

- `graph [nodesep = 0.28, ranksep = 0.5]`: Adjust the vertical and horizontal space between the nodes
- `label = 'Screening'`: Change the labels of each node

Attempt 2 - Finish the Diagram

- `graph [nodesep = 0.28, ranksep = 0.5]`: Adjust the vertical and horizontal space between the nodes
- `label = 'Screening'`: Change the labels of each node

Export Diagram

- To export the diagram, use `library(rsvg)` and `library(DiagrammeRsvg)`
- Assign `grViz` output into an object and run `export_svg %>% charToRaw %>% rsvg_pdf("consort_diagram.pdf")`
- Replace `rsvg_pdf` with `rsvg_png` to save as PNG file instead

Final Code

```
grViz("
digraph {

#First column
1 [label = 'Screening', style = 'solid', shape = 'none', width = 2, fontsize = 18, color = black]
2 [style = 'invisible', shape = 'box', width = 2, fontsize = 48, color = red]
3 [style = 'invisible', shape = 'box', width = 2, fontsize = 48, color = red]
4 [label = '', style = 'invisible', shape = 'none', height = 0, width = 0, fontsize = 12, color = black]
5 [label = <
    Treatment (n=391)<br ALIGN = 'LEFT'/>
    &#8226; 21: Lost to Follow-Up<br ALIGN = 'LEFT'/>
    &#8226; 8: No Delivery Data<br ALIGN = 'LEFT'/>>,
    style = 'solid', shape = 'box', width = 2, fontsize = 18, color = black, penwidth = 1]
6 [label = 'ITT Analysis (n=362)', style = 'solid', shape = 'box', width = 2, fontsize = 18, color = black]

#Second column
7 [label = 'Screened for Eligibility (n=843)', style = 'solid', shape = 'box', width = 2, fontsize = 18, color = black]
8 [label = '', style = 'invisible', shape = 'none', height = 0, width = 0, fontsize = 12, color = black]
9 [label = 'Eligible and Randomized (n=770)', style = 'solid', shape = 'box', width = 2, fontsize = 18, color = black]

{rank=same; '2'; '8'; '14'} {rank=same; '4'; '10'; '16'}  
  
#Use nodesep and ranksep to keep the nodes a bit closer together  
graph [nodesep = 0.10, ranksep = 0.5]
```

Summary and Notes

- CONSORT diagrams provide an effective way of showing participant flow
- We used the DiagrammeR package in R and worked with the GraphViz functionality to build the diagram
 - We did not use the native built-in approach - Syntax is also generally straightforward
- Graph specifications consist of node, edge, and graph statements
- When creating CONSORT diagrams, visualize the grid first!
 - Try to anticipate what nodes you need, what will be modified, and what can go
- Don't limit yourself to just use for randomized trials!

Thank You!!!
